

AYUSH RAMESH SABALE

B.Tech Computer Science | IIIT Pune | 2024–2028

ayushsabale2282@gmail.com • github.com/AyushSabale2013 • linkedin.com/in/AyushSabale • Pune, Maharashtra

OBJECTIVE

Second-year Computer Science undergraduate at IIIT Pune with hands-on experience in machine learning, full-stack development, and AI-powered systems. Applying to Amazon ML Summer School to deepen expertise in deep learning, NLP, and scalable ML systems — bridging academic foundations with industry-grade problem solving.

EDUCATION

Indian Institute of Information Technology, Pune (IIIT Pune)

2024 – 2028

Bachelor of Technology — Computer Science and Engineering | *MIS: 112415039*

Coursework: Data Structures & Algorithms • OOP • DBMS • Operating Systems • Computer Networks • Machine Learning

TECHNICAL SKILLS

Languages: Python, C++, JavaScript

ML / Data Science: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

Web Development: Node.js, Express.js, MongoDB, PostgreSQL, GraphQL, JWT, HTML/CSS

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Figma, Linux

PROJECTS

Movie Recommendation System · [Python](#) · [Scikit-learn](#) · [Pandas](#) · [NumPy](#) · [Streamlit](#)

- ◆ Built a hybrid recommendation engine (**content-based + collaborative filtering**) on the MovieLens dataset (~100K ratings).
- ◆ Applied TF-IDF vectorization and cosine similarity for content-based filtering; implemented SVD-based matrix factorization for collaborative filtering achieving RMSE ~0.91.
- ◆ Performed exploratory data analysis using Matplotlib and Seaborn — uncovering rating distributions, genre trends, and user behavior patterns.
- ◆ Deployed an interactive Streamlit web app enabling real-time personalized recommendations.

FixMyCampus — AI-Powered Campus Issue Tracker · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [NLP Classification](#)

- ◆ Engineered an AI classification engine **using weighted phrase/keyword matching and word-boundary regex** to auto-categorize campus issues — achieved 100% accuracy on a 33-case test suite.
- ◆ Built RESTful APIs with issue lifecycle management (creation → tracking → resolution), secured with JWT authentication and role-based authorization.
- ◆ Designed MongoDB schemas supporting multi-role user interaction, status workflows, and admin dashboards.

Track Academy — Online Coaching Platform · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [REST APIs](#)

- ◆ Developed a full-stack coaching platform enabling educators to manage students, study materials, and performance dashboards.
- ◆ Implemented JWT-based authentication, role-based access control, and session management.
- ◆ Designed RESTful APIs and MongoDB schemas for material uploads, user management, and analytics.

URL Shortener Service · [Node.js](#) · [Express.js](#) · [MongoDB](#)

- ◆ Built a URL shortening service with custom alias support, click-tracking analytics, and expiration logic.
- ◆ Implemented unique hash generation, redirect handling, and MongoDB-backed persistent storage.

COMPETITIVE PROGRAMMING & PROBLEM SOLVING

- ◆ Solved 150+ DSA problems on LeetCode and competitive programming platforms
- ◆ Systematically working through Striver's A2Z DSA Sheet — covering arrays, linked lists, trees, graphs, dynamic programming, and more.
